

ERA Reporter

MedCom's ERA Reporter™ was developed to assist hospitals in processing Medicare's 835 Electronic Remittance Advices (ERA). The ERA Reporter is an easy and comprehensive way of recording reimbursement monies received for the documentation on the CMS-2552-96 Cost Report.

Ease of use in translating complex remittance files.

The ERA Reporter will allow your facility to track your Medicare payments completely and accurately. The software uses Medicare's 835 Electronic Remittance Advice to track and report on the exact amount that Medicare has paid your facility, making it easier to detect over or underpayments. The software summarizes all of the information from the 835 into reports that vary in specificity. The data may be sorted to produce reports based on desired detail of Fiscal Year, Financial Group, Provider Number and 835 Remittance Date. Data integrity is preserved, but the information is clear and easy to understand.

* *General Reimbursement Summary*

This report shows current reimbursement for the current Fiscal Year, prior year reimbursement, previous years and total cash received.

* *Financial Group Summaries*

This report gives a detailed description of the reimbursement for all of the different Financial Groups, and is used to summarize all financial groups onto one report by Fiscal Year structure.

* *Cost Report Summary*

This report shows in total dollars the amounts received for specific financial groups by provider numbers.

* *Provider Level Adjustment*

This reports identifies and reports provider level adjustments that have not been included in the Medicare 835 Remittance Advice.

* *Claims Level Summary*

This report illustrates a patient-by-patient summary of the financial activity deemed appropriate and payable pursuant to Medicare edits.
